NIOCAN INC.

Report to the Shareholders

Period ended September 30, 2007

NOTES TO FINANCIAL STATEMENTS

The Company, incorporated under Part 1A of the Quebec Companies Act on August 29, 1995, holds a niobium property in Oka, Québec and exploration properties in the province of Québec. The Company is at the development stage of its mineral properties and has determined in 1999 that the Oka property contains ore reserves which are economically recoverable.

1. Significant accounting principles :**(a) Mining properties and deferred expenditures :**

Mining assets consist of deferred expenditures and development cost related to properties for which economically recoverable reserves exist. Mining assets are, upon commencement of production, depleted over the estimated life of the ore reserve to which they relate or are written off if the property is abandoned or when there is an impairment in value.

Exploration assets are carried at cost. Exploration and development expenses relating to a non-producing property are deferred until the property is brought into production or abandoned. If exploration work does not provide positive results or upon abandonment, these costs are charged to earnings. Management reviews the carrying values of assets on a regular basis to determine whether any write-downs are necessary.

Recovery of the cost of mining and exploration assets depends on the discovery of economically recoverable ore reserves for the exploration assets, the Company's ability to obtain the necessary financing to complete the exploration and development of the properties and future profitable production or the disposal of the properties for proceeds in excess of their carrying value.

(b) Fixed assets :

Fixed assets are stated at cost. Depreciation is provided using the declining balance method at the following annual rates :

Asset	Rate
Equipment and furniture	20%
Computer equipment	30%

NIOCAN INC.

Period ended September 30, 2007

NOTES TO FINANCIAL STATEMENTS**1. Significant accounting principles (continued) :**

(c) Stock-based compensation and other stock-based payments :

The Company adopted the new accounting recommendations published by the Canadian Institute of Chartered Accountants ("CICA") relating to stock-based compensation and other stock-based payments made in exchange for goods and services. Effective as of January 1, 2004, the Company uses the fair value method to record the stock options granted to all participants.

(d) Future income taxes :

The Company uses the asset and liability method of accounting for income taxes. Under this method, future income taxes are recognized for the future tax consequences attributable to differences between the financial statement carrying values and their respective tax bases. Future tax assets and liabilities are measured using enacted or substantively enacted tax rates anticipated to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The affect on future tax assets and liabilities of a change in tax rates is included in income in the period that includes the enactment date.

The Company renounces tax deductions relating to resource expenditures that are financed by the issuance of flow-through shares for the benefit of its shareholders, as permitted by the tax legislation.

Under the asset and liability method used to account for income taxes, future income taxes related to the temporary differences created by this renouncement are recorded in accordance with EIC-146 when the Company renounces these deductions and a corresponding cost of issuing the securities is also recorded.

(e) Use of estimates:

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Significant areas requiring the use of estimates relate to assessing the realizable values of properties and deferred exploration costs. Consequently, actual result could differ from those estimates.

NOTES TO FINANCIAL STATEMENTS**9. Financial instruments:**

The following methods and assumptions were used to determine the estimated fair value of each class of financial instruments.

Short-term financial instruments:

Cash, short-term investment, accounts receivable, accounts payable and accrued liabilities are short-term financial instruments whose fair value approximates their carrying amount given that they will mature shortly.

10. Commitments and contingencies:

- (a) The Company has leases commitment for premises and the minimum amount payable is \$30,085 in 2007.
- (b) On February 2, 2004, the Company entered into a purchasing agreement with the city of Oka for the acquisition of the St. Lawrence Columbian mine site in the amount of \$200,000. A total non-refundable amount of \$40,000 was paid and the balance of \$160,000 will be payable at the beginning of the construction work on the site and at the latest on December 31, 2007. The Company has also committed to restore and clean an adjacent site. The acquisition of the site is conditional on obtaining all necessary permits, certificates and other authorizations from the Ministère de l'Environnement du Développement durable et des Parcs (MDDEP) du Québec for the Oka project.
- (c) The Company has been named a defendant in a legal action claiming damages in the amount of \$172,000. Management is of the opinion that there is a strong defense against the claim. Accordingly, no provision for losses has been reflected in the accounts of the Company for this matter.

11. Liquidity:

The Company's working capital is \$1,209,651 as compared to \$1,281,162 at the beginning of the period. The Company has no long-term debt and the working capital on hand is sufficient to cover the cost of current administrative expenses.

12. Capital resources:

There was no financing done during the period.
